Thanks, Katrina – I've been perusing the document and the only question I have at this point is on the Conceptual Site Model Technical Memo, Section 3.10 Threatened and Endangered Species. On page 9 is a table of endangered species for the project area with the American Burying Beetle (ABB) listed as "threatened" on the Federal level. While it is true that a petition to delist the ABB is under consideration I believe the ABB is still listed endangered and Creek County falls within its range in Oklahoma. Something to consider...I will forward a separate email to you from Mary McBryar of Enercon (one of my contractors) with some additional information.

Katrina – could you please resend the Wilcox Sampling and Analysis Plan? I have been working with our IT group to receive it. Sorry for the inconvenience.

Subject: Ticket for EPA Emails

Good Morning Judith,

Can you please have Katrina resend the email to you this morning? I believe the problem was since the email size was 18MB and our incoming mail size was set to 15MB. I have adjusted our incoming mail size to accommodate larger emails.

Thank you,

Sara Fair
